See beyond the voxel.

Achieve sub-voxel precision with Dragonfly 3D World's advanced surface determination. Get cleaner meshes, sharper details, and measurements you can trust – down to a fraction of a voxel. Perfect for AM, casting, and electronics inspections.

dragonfly.comet.tech

A product for these times: the inspect Buyer's Guide

When I look back on this turbulent but for inspect also very successful year 2025, I see many companies that have not only continuously developed their products—whether with new technologies (UV, ToF, Smart, etc.) or not—but have also improved their processes and, for example, expanded their target markets and supplier networks.

This makes me feel positive about the approaching future, i.e., the future present. Because our industry has learned from the carelessness of the past. Hardly any company today can afford to focus solely on one customer industry or make itself dependent on a single supplier. Of course, all of this costs money at first, sure. But in the end, it is much cheaper than being unable to deliver for months or even having to suddenly change the entire business model.

Against this background, this inspect Buyer's Guide, which you are holding in your hands or reading digitally, is the perfect product for this time. Because on the following pages, you are guaranteed to find the right supplier for your new project

and the right partner for the next step toward production efficiency and product quality.

Enjoy reading this issue and good luck in 2026!

THE FUTURE DEPENDS ON OPTICS

Imaging Optics Made for You

Edmund Optics® has extensive experience in the design & manufacturing of imaging optics and can seamlessly support your project journey from design, to prototype, to volume production. A broad selection of high-performance off-the-shelf imaging lenses is also available for fast shipment.

- Custom Design & Analysis
- Custom Manufacturing & Supply Chain Leverage
- Product Testing, Evaluation, Metrology
- Extensive Inventory of Imaging Lenses In Stock and Ready to Ship

Machine Vision and Optical Metrology in the World

The inspect Buyer's Guide 2026

The inspect Buyer's Guide is published in its 18th year now, for the same period it also serves as the official Buyer's Guide of the EMVA, the European Machine Vision Association. The guide contains information about more than 500 companies from over 30 countries. It has a clear focus on companies doing business in Europe or exporting their goods to Europe. Naturally, this comprises companies and organizations from all over the world.

The inspect Buyer's Guide is a true cross-media product. On the one hand, it is based on the printed annual publication, on the other hand on our portal www.wileyindustrynews.com/en. Here, under the Buyer's Guide section, you will find all participating companies, including further information about the company. Wherever you are, you will find what you are looking for – either in the printed version or on our online portal. Additionally, there you'll find all the news on machine vision and photonics that move the industry, as well as interesting technology reports and applications.

Companies wanting to provide more information and aiming at even better search results are listed with a company profile, including detailed company data and a listing of products offered, industries served and applications catered to.

The online Buyer's Guide is open for companies within the scope of the inspect all year round. In this way it is always up-to-date.

Clear Focus and Benefit

The availability of data online is a clear benefit when presented with clever search functions. However, sometimes you do not want to bother going online, or you don't want to search specifically but rather obtain a quick overview. In these instances a printed version has its unchallenged advantages. Not to mention the ease-of-use when taking notes right next to the provided data. Thus, once a year the printed edition of the inspect Buyer's Guide is provided to you. With this guide we aim to give you a full overview that is still easy to use, a complete set of information that is still not too subdivided into too many categories.

The inspect Buyer's Guide 2026 is divided into three main chapters: Topics, company profiles for the main global regions, and company listings for the main product categories. In an industry as innovative and dynamic as ours it will most likely never be possible to provide an overview that is final and complete, but we do our best to come as close as possible. ■

FILTERS: A NECESSITY, NOT AN ACCESSORY.

INNOVATIVE FILTER DESIGNS FOR INDUSTRIAL IMAGING

Optical Performance: high transmission and superior out-of-band blocking for maximum contrast

StableEDGE[®] Technology: superior wavelength control at any angle or lens field of view

Unmatched Durability: durable coatings designed to withstand harsh environments

Exceptional Quality: 100% tested and inspected to ensure surface quality exceeds industry standard

Product Availability: same-day shipping on over 3,000 mounted and unmounted filters

While today's GenIcam ecosystem exposes a complex configuration interface, GenFeA introduces a leaner and more efficient way of configuration.

GenFeA: Lowering Barriers to Machine Vision Integration

New GenIcam module proposal

Generic Feature Access (GenFeA) is a proposed standard programming interface for the configuration of machine vision devices. Initiated by the GenIcam working group, GenFeA is tailored to the needs of the machine vision industry and addresses several long-standing requirements for using GenIcam devices in a leaner and more efficient way. The GenIcam standard is hosted by the European Machine Vision Association (EMVA).

The Generic Feature Access initiative aims to simplify implementation, reduce resource consumption, and enable broader compatibility across embedded systems and heterogeneous device architectures.

Addressing Practical Challenges

GenFeA is designed to reduce the effort required to integrate machine vision devices

into software systems. It offers several key advantages. Amongst these are lower entry barriers for vendors. Manufacturers with existing device APIs are able to participate in the GenIcam ecosystem without the need to generate and maintain XML files. This is particularly beneficial for companies entering the machine vision market from adjacent fields such as embedded vision. Furthermore, GenFeA enables simplified integration for soft-

ware developers, as device configuration can be performed using a straightforward C-style API, similar to the GenTL interface already used for image transmission. This reduces the complexity of development and facilitates faster integration. In addition, the new GenIcam module offers support for modular system architectures. GenFeA enables the combination of components from different vendors, such as cameras, lens controllers, and image signal processors, into a cohesive system. This modularity supports scalable and flexible solutions. Finally, GenFeA proposes improved compatibility with emerging technologies. Devices such as embedded cameras or software-defined components can be more easily integrated into the GenIcam ecosystem. This promotes innovation and broadens the scope of machine vision applications.

A Flexible Approach to Feature Access

By addressing all above mentioned challenges, GenFeA introduces a more adaptable way of describing and accessing device features, as it focuses on the presence and behavior of features, without prescribing implementation details; and supports both standardized and vendor-specific features. It also allows vendors to avoid XML parsing at runtime, while still supporting XML internally if preferred. By doing all this, it remains compatible with the GenICam Standard Feature Naming Convention, ensuring consistency across tools and interfaces. This approach makes GenFeA suitable for a wide range of applications, from lightweight embedded systems to complex industrial environments.

Implementation Progress

To support adoption, the GenICam working group is developing a wrapper library called FeAForGenApi. This shared library exposes the GenFeA interface while internally relying on the existing GenICam reference implementation (GenApi). It provides access to the same functionality as GenApi, but through a simplified and more accessible interface. This initial implementation offers a practical way to begin working with GenFeA. It allows developers to benefit from the new interface without needing to replace existing infrastructure.

Conclusion

GenFeA provides a structured and efficient solution to long-standing challenges in

machine vision integration. By reducing complexity and supporting modularity, it enables more streamlined development and broader adoption of machine vision technologies. For decision-makers, GenFeA represents an opportunity to enhance interoperability, reduce development overhead, and support innovation across a diverse range of platforms and industries.

About autoVimation

autoVimation provides protective camera enclosures and a wide range of accessories that allow the use of vision systems in any environment. Thanks to the patented camera mounts, the enclosure works like a heat-sink and cools the installed camera, so it can be used at higher temperatures.

Water- and Peltier- climatization permit the operation of vision systems from -40 °C to +250 °C – Shutter and Wind Curtains ensure clear vision in dirty environments.

The „Machine Vision Building Kit“ enables easy installation of vision components with pre-fabricated parts. The „Hygienic Building Kit“ offers

the same for sensitive food- and pharma productions.

New Products 2025:

- New Elephant enclosures cameras now with inbuilt water- and peltier-cooling.
- Lizard enclosure with flexible lens tube system.
- Rear Wall S with stainless steel connectors.

About Comet Yxlon

Comet Yxlon is a leading global brand for high-end X-ray-based system solutions for non-destructive materials testing in industrial environments, as well as for research facilities and scientific institutions. Comet Yxlon inspection solutions help customers ensure product quality, optimize their manufacturing processes, and enhance efficiency and productivity.

With a focus on easy operation and high throughput, the robust systems support manual, semi-automatic, and fully automated operation in demanding production environments. The high precision computed tomography systems support research and development and enable

detailed structural analysis, metrology applications, and simulation models. With power ranges of up to 600 kV, large, dense castings can reliably be scanned and analyzed, while precise microfocus tubes reveal minute details of modern electronic components in the semiconductor and electronics industries.

With sales and service locations in North America, China, Korea, Japan, and Taiwan, along with a global partner network covering around 50 countries, and the digitalization of the global service organization, Comet Yxlon support and service is directly on-site with their customers everywhere.

About Dragonfly

Dragonfly, a brand of Comet, is a global leader in advanced 3D visualization and analysis software for today's most demanding 2D, 3D, and 4D imaging studies.

The software solutions from Dragonfly support manufacturers, engineers, and scientists to perform complex image analyses and gain actionable information from their data in a repeatable, reliable, and cost-efficient way. Equipped with an advanced machine learning-based segmentation and an intuitive user interface, our software transforms powerful and

accurate quantitative findings into high-impact visuals.

Our flagship software, Dragonfly 3D World offers powerful tools to process, segment, visualize and analyze complex datasets from CT, Microscopy, and SEM with unprecedented speed and accuracy. Key capabilities include the integration of the Meta's Segment Anything Model (SAM) for one-click segmentation and the revamped Surface Determination that achieve sub-voxel precision in mesh generation for CAD validation and defect analysis.

About Emergent Vision Technologies

Emergent Vision Technologies (EVT) is a leading manufacturer of high-speed imaging systems. We specialize in developing advanced GigE Vision cameras, offering 10GigE, 25GigE, and 100GigE interface support to meet diverse industrial and scientific imaging needs.

Mission

EVT is committed to innovation, quality, and customer satisfaction, ensuring our products meet the evolving demands of the imaging market. We have special capabilities in ultra high-speed imaging and multi-camera systems—all with the highest performance and without frame drops.

New for 2026:

- Full availability for Eros, the smallest, lowest power 10GigE cameras in the world.
- New Zenith 100GigE cameras with the latest sensors from Sony and Gpixel.
- eSDK Pro that reduces vision programming by up to 90%.

About JAI

Founded in 1963, JAI is a global provider of high-performance industrial machine vision cameras, offering an extensive portfolio of advanced imaging solutions for automation, inspection, and quality-control applications. JAI specializes in cameras that deliver exceptional color accuracy, image precision, and long-term reliability - even in demanding and high-speed production environments.

A key strength is JAI's prism-based multi-sensor technology, which ensures outstanding color fidelity and precise spatial alignment for applications where image quality is critical. Combined with a broad selection of monochrome, multispectral, SWIR, and high-resolution CMOS cameras, JAI enables customers to address both standard and highly specialized vision tasks with confidence.

About Lucid Vision Labs

Lucid Vision Labs, Inc. designs and manufactures innovative machine vision cameras and components that utilize the latest technologies to deliver exceptional value to customers. Our compact, high-performance GigE Vision cameras are suited for a wide range of industries and applications such as factory automation,

medical, life sciences and logistics. Our expertise combines deep industry experience with a passion for product quality, technology innovation and customer service excellence. LUCID Vision Labs, Inc. was founded in January 2017 and is located in Burnaby, BC, Canada with local offices in Germany, Japan, South Korea, China, and Taiwan.

About Macnica ATD

Macnica ATD Europe is the European subsidiary of Macnica Inc., one of the world's largest semiconductor distributors, founded in Yokohama, Japan in 1972. Macnica employs 5,000+ technical specialists and operates 90+ sales offices worldwide. The group entered Europe in 2006, established its German headquarters Macnica GmbH in 2008, and acquired Scantec Mikroelektronik in 2014. In 2020 Macnica strengthened its presence by acquiring ATD Electronique, a French distributor focused on machine-vision components and imaging solutions, creating Macnica ATD Europe. Today, Macnica provides end-to-end support for product development and distribution, backed by a global service network and new AI Technology Solutions.

About Opto

Opto produces intelligent digital microscopes and vision sensors as imaging modules and job modules for medtech and industry applications in standard and custom versions.

We deliver AI ready images and specific DATA sets

to be implemented into biomed screening machines and industry 4.0 solutions.

Multi-fluorescence, flow cytometry, laserintegration and microfluidic lab on a chip imaging applications, for the integration into machines or POCT devices are our daily business.

Opto designs and produces standardized job modules with special software for dedicated applications. Plug and operate.

With over 45 years of experience in delivering specific opto-mechatronic solutions together with high end software features we are the perfect partner for integrators, product manufacturers and machine builders.

LUCID's High-Speed Atlas25 – 25GigE and Triton10 – 10GigE Cameras with RDMA

LUCID's Triton10 camera family features the latest Sony Pregius S CMOS sensors from 2.8 MP to 47.0 MP, achieving frame rates up to 216 fps. Delivering cost-effective 10GigE performance, Triton10 is GigE Vision 3.0 RDMA ready and supports standard GigE Vision UDP streaming protocol at 10, 5, 2.5, and 1 GbE speeds for broad compatibility. Designed for demanding industrial environments, it offers IP67 protection, Power over Ethernet (PoE), and a rugged 17-pin M12 GPIO connector. The Atlas25 camera is engineered for OEMs and system integrators requiring deterministic, high-bandwidth imaging in demanding applications. With 25GigE performance and GigE Vision 3.0 readiness, it eliminates the SFP module through direct LC connectivity—simplifying system design, reducing power consumption, and enhancing reliability. A new 17-pin GPIO connector offers greater integration flexibility with additional I/O lines, including high-speed differential input. RDMA support enables direct data transfer to main memory, bypassing the CPU for higher throughput and lower latency.

Corrosion Inspector

The Corrosion Inspector by Schäfter+Kirchhoff automatically evaluates corrosion test panels and delivers a very high-contrast image with a resolution of 0.022 mm per pixel in only 1.2 sec (5s including all procedures). Implemented evaluation methods (acc. to international standards) are: Cross-cut classification, edge corrosion characteristic, filiform corrosion with counting/length measurement of threads, degree of delamination and corrosion, Blistering, Stone impact resistance.

The system was developed for rapid and objective corrosion evaluations with high sample throughput. The system supports color and monochrome grayscale images.

Advantech's vision, "Enable an Intelligent Planet," reflects its leadership in IoT intelligent systems and embedded platforms. Addressing the rapid growth of IoT, big data, and AI, Advantech provides comprehensive solutions built on its Wise-IoT Suite to help partners connect their industrial value chains and accelerate digital transformation. The company also co-creates business ecosystems that drive industrial intelligence. Additionally, Advantech is the only company offering an IPC delivered fully configured with a customer-specified frame grabber, providing a ready-to-use and optimized solution.

At HAIP Solutions, we develop advanced hyperspectral imaging systems designed for precise, repeatable, and application-oriented material analysis. Our technology spans the range from VIS to SWIR and integrates high-performance line-scan cameras with dedicated acquisition and processing software, as well as application-specific illumination modules. These components form a coordinated system that enables users in research, industrial automation, and system integration to convert complex spectral signatures into quantifiable, decision-relevant data. Every product reflects our commitment to accuracy, usability, and long-term stability. We provide a flexible platform that enables users to analyze materials, optimize processes, and push the boundaries of what hyperspectral imaging can achieve.

Lumimax LED lights by iiM GmbH – part of Exaktera – are designed and developed for challenging industrial Machine Vision applications across sectors like automotive, semiconductor, pharma, and food & beverage. High performance lighting with integrated controller technology for continuous, switch or strobe operation ensures utmost functionality and

stable, extraneous light-independent illumination of your test objects – even for extremely fast processes. Additional mounting solutions for different cameras, diffusors, fresnel lenses are available, too. The team of iiM GmbH has extensive experience in Machine Vision and always applies this knowledge excellently in product design and consulting.

Manufacturer

MBJ Imaging GmbH develops, produces and distributes LED lighting and controllers for industrial image processing. Lighting as a core component for industrial image processing is crucial for the performance of an automatic inspection system. MJB

Imaging was born out of the conviction that lighting for machine vision systems must be so cost-effective and at the same time of such high quality that it is not necessary for anyone to develop their own lighting. This idea still guides us in everything we do.

MBJ Imaging GmbH · Jochim-Klindt-Straße 7, 22926 Ahrensburg, Germany,
Tel: +49 4102 77 89 0 30, sales@mbj-imaging.com, www.mbj-imaging.com

Solution Provider

The startup Medabsy UG (Germany) provides an online platform for creating digital twins of machine vision systems, making it possible to solve image processing projects before having access to the required hardware. This involves inserting optical components (cameras, lighting, lenses etc.)

from a digital catalogue, as well as the 3D file of the object to be measured into the 3D-editor. The software then generates photorealistic images from the camera perspective, which can then be used for algorithmic image processing.

Medabsy UG · Speisemarkt 8, 84130 Dingolfing, Germany, Tel: +49 157 783 311 96, info@medabsy.com, medabsy.eu

Distributor

More than 20 years of experience in complex optical, electrical, FPGA-as software-engineering and project planning, administration and integration are ready to help you on your way up.

Vision Engineering is a global leading-edge manufacturer of unique ergonomic stereo microscopes and non-contact measuring systems. Since its formation in 1958, Vision Engineering has become one of the world's most innovative and dynamic microscope manufacturers, with a global distribution network. The product range includes solutions for almost every inspection and measurement application. Choose unparalleled clarity and precision. Innovative and superior ergonomic designs lead to performance and productivity gains. Quality is the goal! For us and our customers as well. That's the reason why we present to our customer worldwide successful products. The eyepiece-less technology which is implemented in our systems allows a nearly fatigue-free operation with the microscope. More comfort is not possible.

DataPixel develops and manufactures 3D vision solutions for high speed and high accuracy non-contact measurement for automotive, aerospace, electronics, plastics and glass. DataPixel OptiScan sensors can be integrated on Coordinate Measurement Machines (CMM), robots and in-line inspection machines. DataPixel 3D pointcloud analysis software products provide the most advanced geometrical feature extraction and CAD comparison functions.

Teledyne Adimec specializes in the development and manufacturing of high-performance cameras that meet the application-specific requirements of key market segments, including machine vision, healthcare imaging, and global security. Founded in 1992, the company partners with major OEMs around the world to facilitate the creation of industry-leading cameras. Teledyne

Adimec's unique True Accurate Imaging technology provides new levels of precision and accuracy to vision systems. Its diverse line of camera products meet a wide range of performance, size, cost, interface and application requirements. Teledyne Adimec has offices around the world focused on creating customer value and satisfaction through local, personalized support.

Zebra Technologies understands that real growth requires vision. With advanced automation technology and deep industry expertise, Zebra enhances every step of manufacturing and distribution supply chains. Its Fixed Industrial Scanners (FIS) and Machine Vision (MV) solutions form the industry's most advanced and expanding portfolio. Zebra's Fixed Industrial Scanners ensures fast, accurate barcode scanning for tasks like parcel sorting and inventory tracking, while Machine Vision systems leverage imaging and AI for quality control, defect detection, and label inspection. Powered by Zebra Aurora software, these solutions are easy to configure, integrate, and scale, improving efficiency, traceability, and accuracy to help businesses achieve sustainable growth and adapt to evolving demands.

Solution Provider

For over 30 years the DSI brand has been active in waterjet portioning of boneless proteins. The addition of intelligent horizontal slicing in 2008 enabled true three-dimensional portioning and double digit yield enhancement in the portioning of large poultry breast meat.

New DSI blade portioning and sorting equipment in 2016 as well as an X-ray guided waterjet solution in 2017 has allowed DSI products to continue to reach new customers worldwide including poultry, beef, pork, fish and bakery applications.

JAI is a global manufacturer of digital cameras for machine vision, traffic imaging, global security, medical imaging and scientific research. Besides a broad range of leading-edge 1-CMOS progressive area scan and line scan cameras, JAI is a leading provider of multi-imager cameras incorporating advanced prism-block technology,

including 3-CMOS RGB area scan cameras, 2-CMOS multi-spectral cameras plus a complete family of 3-CMOS/4-CMOS line scan cameras. JAI's product program includes cameras for visible, UV, NIR and SWIR imaging with GigE Vision, USB3 Vision, CoaXPress, Camera Link and SFP+ interfaces.

Producer

Nacacue Corporation was established in August 1980. The company specializes in developing new technology. Specifically in fields closely link to trends in society. It manufactures optical equipment, LED lighting solutions and electronic control systems for industrial machine vision. The company goal is to contribute to the societies in which our customers are located through developing new technology to cultivate new markets.

Nacacue Corporation · 194-1, Higashitsuchikawa-cho, Kuze, Minami-ku, 601-8204 Kyoto, Japan, Tel: +81 75 934 41 78, info@nacacue.co.jp, www.nacacue.com

Producer

OPT is founded in 2005, following its continuous growing, OPT has developed one of the leading enterprise in machine vision industry. The main products are LED lights for machine vision application, lens, and other vision solution components.

OPT is a LED lights provider, which is focused on LED light and vision components for research and production. By the hard works of OPTers, the company has enlarged its standard series into 38 types, besides that there are more than 100,000 customized lights available for support.

ViTec company was established in 1995 with headquarters located in Saint-Petersburg. Since that time it has been working in the field of industrial measurements and automation. Through access to modern technologies and technical equipment the

team of professionals can efficiently solve the most complex technical problems. In order to increase the speed of customer service in Siberia and the Far East a ViTec-Siberia department was opened in 2006 in Tomsk.

ViTec-Avtomatika OOO · Fontanka 170, 198035 Saint-Petersburg, Russian Federation, info@vitec.ru, www.vitec.ru

Producer

Viewworks' industrial cameras create values beyond what is visible.

Viewworks develops industrial cameras based on the industry's top optical design technology. The industrial camera plays the role of an "eye" in the machine vision, which is one of

the core areas of industrial automation. For quality control and stabilization of the inspection objects, the company focuses on the development of camera technologies for taking higher resolution at a faster speed.

Viewworks Co., Ltd. · 41-3, Burim-ro 170beon-gil, Dongan-gu, Anyang-si, Gyeonggi-do, 14055 Republic of Korea, Tel: +82 70 7011 6161, vision@viewworks.com, vision.viewworks.com

Manufacturer / Producer

Weihai Hualing Opto-Electronics (WHEC) is a Sino-Japanese joint venture with 26-year experience of developing and manufacturing contact image sensors (CIS). Compared with traditional line scan cameras, CIS works at a close working distance while maintaining clear, sharp

image definition over its entire length, is used for vision inspection applications such as web, label, battery film, etc. Besides, WHEC offers flexible customization service to enable CIS technology to fit a wide range of devices and applications.

Weihai Hualing Opto-Electronics Co., Ltd. · 179 Keij Road Hi-Tech IDZ, 264209 Weihai Shandong, China, Tel: +86 631 569 81 28, shikexing@whhec8.cn, www.w-hec.com/en

Advertising price list
from October 2025

Circulation
10,000 copies

Individual Copies

Single copy € 16.30 plus postage.

Pupils and students receive a
discount of 50 % at sight of a valid
certificate.

Subscription orders can be revoked
within 1 week in writing. Dispatch
complaints are possible only within
four weeks after publishing date.
Subscription cancellations are ac-
cepted six weeks before end of year.

Specially identified contributions
are the responsibility of the author.
Manuscripts should be addressed
to the editorial office. We assume
no liability for unsolicited, submitted
manuscripts. Reproduction, includ-
ing excerpts, is permitted only with
the permission of the editorial office
and with citation of the source.

The publishing house is granted the
exclusive right, with regard to space,
time and content to use the works/
editorial contributions in unchanged
or edited form for any and all pur-
poses any number of times itself, or
to transfer the rights for the use of
other organizations in which it holds
partnership interests, as well as to
third parties. This right of use relates
to print as well as electronic media,
including the Internet, as well as
databases/data carriers of any kind.

Material in advertisements and
promotional features may be con-
sidered to represent the views of the
advertisers and promoters.

All names, designations or signs
in this issue, whether referred to
and/or shown, could be trade
names of the respective owner

Teledyne Vision Solutions

One Source. Unlimited Vision.

Teledyne Vision Solutions offers the world's most comprehensive, vertically integrated portfolio of industrial and scientific imaging technology. Aligned under one umbrella, **Teledyne DALSA**, **e2v CMOS image sensors**, **FLIR IIS**, **Lumenera**, **Photometrics**, **Princeton Instruments**, **Judson Technologies**, **Acton Optics**, and **Adimec** form an unrivalled collective of expertise across the spectrum with decades of experience and best-in-class solutions.
